

RAHUL KUMAR RAJAK

Frontend Developer | React.js | Next.js | Vue.js | JavaScript | TypeScript

Ghaziabad, Uttar Pradesh | +91 7355042995 | rahulrajak525@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years building production interfaces in React.js and Vue.js. Sole frontend developer on an enterprise civic-communication SaaS platform for Dutch municipalities, leading its module-by-module Vue 3 to React migration in production without disrupting live users. Built an internal Claude Code agent that keeps a React Native app in sync with its React web codebase, and shipped a full-stack MERN application end to end.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Vue.js 3, Redux, React Router, Vuetify 3, Tailwind CSS

Libraries & UI: TipTap, Leaflet, ApexCharts, Socket.io, Material-UI (MUI), React Hook Form

Backend & Database: Node.js, Express.js, MongoDB, Mongoose, REST APIs

Tools & Practices: Vite, Git, GitLab CI/CD, LaunchDarkly, Sentry, Product Fruits, Shortcut

AI-Assisted Dev: Claude Code, Cursor AI, Codex, Lovable, Grok, Gemini

PROFESSIONAL EXPERIENCE

Frontend Developer — Treeroot Informatics

Jun 2023 – Present

Remote

- Engineered a map-based stakeholder-communication module letting users send physical letters to recipients selected from stakeholder groups or dynamically targeted via interactive map regions — implementing document upload, envelope configuration, postal validation, and third-party mailing-service integration for automated printing and delivery — built on Vue 3, Vuetify 3, Pinia, and Socket.io.
- Leading a module-by-module Vue-to-React migration in production, with the React frontend as a Git submodule so legacy and migrated modules ship side by side; scoped the stakeholder detail page by identifying 15 functional gaps including LaunchDarkly gating, permission-based UI and merge dialogs.
- Specified and built Updates V2, a drag-and-drop block editor — 40 tickets across 10 epics from Figma analysis, covering block serialization and hydration — plus a React Kanban board with inline editing and custom hooks.
- Built an internal Claude Code agent that regenerates an Expo / React Native app whenever the React web codebase changes, enforcing route parity and deterministic style conversion; replaced a manual per-change conversion step.
- Integrated LaunchDarkly, Sentry and Product Fruits; delivered via GitLab merge requests and CI/CD to GKE, tracked in Shortcut. Previously built React and Redux financial dashboards for a Credit Management System serving Dutch enterprise clients.

Frontend Developer — Sharpener.tech

Jul 2022 – Mar 2023

Internship

- Built and shipped frontend features using React.js, Redux and React Router through structured, project-based training, moving from a Mechanical Engineering background into professional software development.

PROJECTS

Kora — Full-Stack MERN E-Commerce Platform

2026

- Built a complete e-commerce platform solo — storefront, admin dashboard and the REST API serving both — in a single repository.
- Implemented Stripe and Razorpay checkout plus cash on delivery, JWT authentication with bcrypt password hashing, an optimistic-update cart, and an admin panel with Cloudinary uploads and order-status workflows.
- Stack: React 19, Vite, Tailwind CSS v4, React Router 7, Express 5, MongoDB/Mongoose, JWT, bcrypt, Cloudinary, Stripe, Razorpay.
